## **DETAILED ACTION**

### ***Claim Objections***

1. Claims 16,44,48 are objected to under 37 CFR 1.75 as being a substantial duplicate of claims 37,45,49, respectively. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).

### ***Claim Rejections - 35 USC § 101***

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

3. Claims 43-46 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claim 18 recite 'a processing unit...operative to: utilize a computer-implemented application'. These claims merely recite a program per se, which is not permissible under the Examination Guidelines for Computers - Related Inventions. The system claim should have the application being stored on the memory storage.

### ***Allowable Subject Matter***

4. Claims 15,38-42,47,50-54 are allowed.

### ***Response to Arguments***

5. Applicant's arguments have been fully considered. There are claim objections and a 101 rejection pending in the application as cited above.
